-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 23 July 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 11-087676 (JP '676). JP '676 discloses a method for manufacturing a color filter comprising the steps of forming a first resist layer having openings on a base plate, forming a pigment layer on the first resist layer, forming a second resist layer on the pigment layer, etching the second resist layer flat to expose the first resist layer, removing the first and second resist layers, and repeating the process for two or more color components. See the abstracts; paragraphs [0012]-[0017] of the computer generated translation; and Figures 1(a)-(d).

2. Claims 6-10 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,076,860 to Kuroda (Kuroda). Kuroda discloses a method of forming electrode wirings in semiconductor devices comprising the steps of forming a first photoresist pattern on a surface; vapor depositing a conductor layer of electrode material on the pattern-containing surface; applying a second photoresist on the conductor layer; etching the second photoresist until only the upper surface of the part of the conductor layer located above the first photoresist pattern is exposed, thereby forming a second photoresist pattern; etching the conductor layer with the second photoresist pattern as an etch

mask; and dissolving the first and second photoresist patterns. See the abstract; column 2, line 18 to column 3, line 10; and Figures 2a-g.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John A. McPherson whose telephone number is (571) 272-1386. The examiner can normally be reached on Monday through Friday, 8:00 AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on (571) 272-1385. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
